# **2011 ANNUAL ADMINISTRATIVE CLAIMS DATA REPORT**

## **INTRODUCTION**

Thank you for your interest in the **2011 Annual Administrative Claims Data Report**. This report covers the inpatient hospital discharge, emergency department utilization and utilization of Cardiac Catheterization Labs by licensed Kentucky hospitals for the calendar year January 1, through December 31, 2011. The report also covers ambulatory surgery, mammogram, and other outpatient procedure utilization by hospitals or ambulatory facilities that perform these procedures. The administrative claims data submitted by hospitals and ambulatory facilities as required by 900 KAR 7:030 – Data Reporting by Health Care Providers was used to produce the utilization information in this report. This year two new sections were added to the report to reflect utilization of ambulatory surgery, and mammogram and other outpatient procedures including but not limited to procedures such as Magnetic Resonance Imaging (MRI), Computed Tomography (CAT), Radiation Treatment Delivery – including Linear Accelerator based, Neutron Beam Treatment Delivery, Radiation Treatment and Therapy Management, Proton Treatment Delivery, Clinical Brachytherapy, Positron Emission Tomography (PET), and Cardiac Catheterization procedures

The Kentucky Annual Administrative Claims Data Report uses the administrative claims data to determine utilization. The Certificate of Need Inventory of Health Facilities and Services provides information about the number of cardiac catheterization labs that have received CON approval. This list may be viewed on our web site at: <http://chfs.ky.gov/ohp/con/> .

The report is divided into 6 sections:

- ♦ **Section I – Maps of the locations of Diagnostic Cardiac Catheterization Labs and Therapeutic Cardiac Catheterization Labs in Kentucky**
- ♦ **Section II – Cardiac Catheterization Utilization**
- ♦ **Section III – Inpatient Utilization Data from Administrative Claims Data**
- ♦ **Section IV – Emergency Department Utilization Data from Administrative Claims Data**
- ♦ **Section V – Ambulatory Surgery Utilization from Administrative Claims Data**
- ♦ **Section VI – Mammogram and Other Outpatient Procedure Utilization from Administrative Claims Data**

The source of all data used to produce this report is the administrative claims data submitted pursuant to 900 KAR 7:030 – Data Reporting by Health Care Providers.

Questions or comments regarding the data contained in this report should be directed to Chandra Venettozzi at (502) 564-9592, ext. 3160 or Allison Lile at (502) 564-9592, ext. 3155, or e-mail: [Chandra.Venettozzi@ky.gov](mailto:Chandra.Venettozzi@ky.gov) or [Allison.Lile@ky.gov](mailto:Allison.Lile@ky.gov).

This report becomes the most recent official data on hospital services and outpatient services utilization published by the Cabinet for Health Services. ## 2011 ANNUAL ADMINISTRATIVE CLAIMS REPORT

### Section II

#### Cardiac Catheterization Utilization

Cardiac catheterization is a diagnostic or therapeutic procedure in which a catheter is introduced into a large vein or artery, usually of an arm or leg, and threaded through the circulatory system to the heart. A single procedure lasts from the time the catheter is inserted until the time that the catheter is completely withdrawn from the patient. With regard to cardiac catheterization services the term “laboratory” (lab) means each dedicated room within a fixed-site facility which is individually equipped and staffed for the purposes of performing cardiac catheterizations.

To determine the number of cardiac catheterizations performed, each administrative claims record was examined to determine if it contained one of the following procedure codes. Inpatient Hospital Discharge records were examined for ICD-9 Procedure codes as published in the 2011 Professional Edition ICD-9-CM manual for Hospitals Volume 3, while Outpatient Services Records were examined for CPT Procedure codes as published in the 2011 Professional Edition Current Procedural Terminology manual.

0050 - 0051	33206 - 33207	0045 - 0048	0234T – 0238T

8859	93660		G0291
	93619		G0290

NOTE: Electrophysiologic testing procedures were counted as “diagnostic” catheterizations.

**All Therapeutic:** Includes a count of the number of administrative claims records where the record included at least one Therapeutic Code regardless of the presence of any Diagnostic code(s).

**All Diagnostic:** Includes a count of the number of administrative claims records where the record included at least one Diagnostic Code regardless of the presence of any Therapeutic code(s)

**Therapeutic & Diagnostic:** Includes a count of the number of administrative claims records where the record included at least one Diagnostic code AND at least one Therapeutic code. This count includes the overlap of the previous two groups.

“Pediatric” means the patient age is 17 years or less. “Adult” means the patient age is 18 years or greater.

**Table 1** shows therapeutic and diagnostic cardiac catheterization utilization.

## 2011 ANNUAL ADMINISTRATIVE CLAIMS DATA REPORT

### SECTION IV

#### EMERGENCY DEPARTMENT UTILIZATION

**TABLE 5:** Emergency Department Utilization by Facility and Payor

**CHART 5.1:** Primary Payor, Kentucky Emergency Department Visits, 2011

**CHART 5.2:** Emergency Department Visits, Primary Payor vs. Kentucky Hospital ADD, 2011

**TABLE 6.1:** Emergency Department - Selected Category Summary by Quarter, All Kentucky Hospitals

**TABLE 6.2:** Emergency Department - Selected Category Summary by Quarter, Hospital ADDs

**TABLE 7.1:** Emergency Department - Leading Twenty-five Primary Diagnosis, All Kentucky Hospitals

**TABLE 7.2:** Emergency Department - Leading Twenty-five Primary Diagnosis by Hospital ADD

#### Notes

- 1) Data in Section IV was compiled from Kentucky hospital emergency department claims as submitted on Universal Electronic Billing Record (837) prior to May 31, 2012. These data may not correspond with data in the self-reported survey sections the Annual Hospital Utilization and Services Report. Emergency department utilization indicates a visit to an emergency department where the patient was treated and released or held for an observation stay, but the patient was not admitted to the hospital.
- 2) Table 5 and Charts 5.1 and 5.2 summarize emergency department visits by primary payor categories Medicaid (Including Medicaid Managed Care), Medicare, and Other (any payor that is not Medicaid or Medicare such as Commercial, Other State or Federal Programs, Self-Pay, Workers Compensation, etc.)
- 3) Tables 6.1 and 6.2 summarize quarterly emergency department visits by residence state, gender, age, type of service, month of service, and primary payor.
